

AMENDMENTS TO THE CLAIMS:

The following is the status of the claims of the above-captioned application, as amended.

Claims 1-6 (Canceled).

Claim 7 (Previously presented). A method of washing a fabric, comprising contacting the fabric with a detergent composition in an aqueous medium, wherein the detergent composition comprises (a) an enzyme having lysostaphin activity, (b) a surfactant, and (c) one or more of amylase, arabinase, galactanase, lipase, mannanase, pectinase, protease, and xylanase.

Claim 8 (Previously presented). The method of claim 7, wherein the enzyme is a lysostaphin.

Claim 9 (Previously presented). The method of claim 7, wherein the detergent composition comprises an amylase.

Claim 10 (Previously presented). The method of claim 7, wherein the detergent composition comprises an arabinase.

Claim 11 (Previously presented). The method of claim 7, wherein the detergent composition comprises a galactanase.

Claim 12 (Previously presented). The method of claim 7, wherein the detergent composition comprises a lipase.

Claim 13 (Previously presented). The method of claim 7, wherein the detergent composition comprises a mannanase.

Claim 14 (Previously presented). The method of claim 7, wherein the detergent composition comprises a pectinase.

Claim 15 (Previously presented). The method of claim 7, wherein the detergent composition comprises a protease.

Claim 16 (Previously presented). The method of claim 7, wherein the detergent composition comprises a xylanase.

Claim 17 (Previously presented). The method of claim 7, wherein the detergent further comprises a detergent builder or complexing agent.

Claim 18 (Previously presented). The method of claim 7, wherein the detergent further comprises a polymer.

Claim 19 (Previously presented). The method of claim 7, wherein the detergent further comprises a bleaching system.

Claim 20 (Previously presented). The method of claim 7, wherein the detergent further comprises a stabilizing agent.

Claim 21 (Previously presented). The method of claim 7, wherein the detergent further comprises one or more of a fabric conditioner, foam booster, suds suppressor, anti-corrosion agent, soil-suspending agent, anti-soil redeposition agent, dye, bactericide, optical brightener, hydrotrope, tarnish inhibitor and perfume.

Claim 22 (Previously presented). The method of claim 7, wherein the washed fabric has a malodor index which is at least 10% less compared to laundry which has not been contacted with an enzyme having lysostaphin activity.
